

Components

OEM solutions
with intelligent, energy-efficient SAUTER products.

 **SAUTER**
Creating Sustainable Environments.

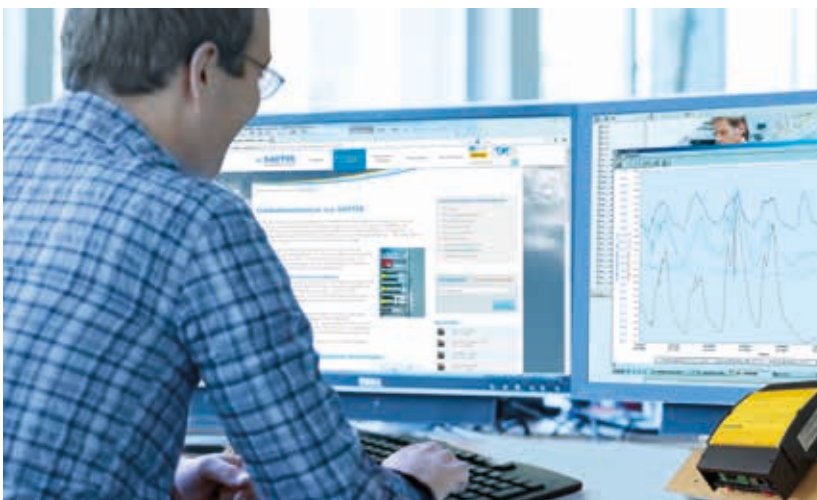

Our experience is your advantage.

With OEM solutions from SAUTER, you benefit from over 100 years of expertise and innovation.

SAUTER is an experienced manufacturer and supplier of energy-efficient components and solutions for state-of-the-art building automation. With this expertise we also develop and produce tailored components, products and solutions for our OEM customers. From automation to field level, individually or as a system: our OEM range provides optimum energy efficiency and reliable comfort.

Adaptability and speed combined with local know-how:

- Customer-specific solution with reliable cost control
- Expert consulting during design, development and commissioning
- Dynamic development and production of OEM solutions for building automation
- Well-founded verification of the CO₂ balance for our products
- On-site training and support

Prestigious companies rely on SAUTER.

Unique flexibility for precise results.

With short communication paths, SAUTER enables the producers of HVAC devices to attain their goals quickly. Our focussed product development process ensures that OEM components from SAUTER exactly match local customer requirements and can be relied on for precise control.

Less work and more efficiency for you.

Solutions from SAUTER reduce the fitting work involved and enable time and cost savings. By optimising energy efficiency they enable additional operating cost reductions. OEM partners and their customers both profit from increased return on investment and sustainability.

OEM solutions for every HVAC application.

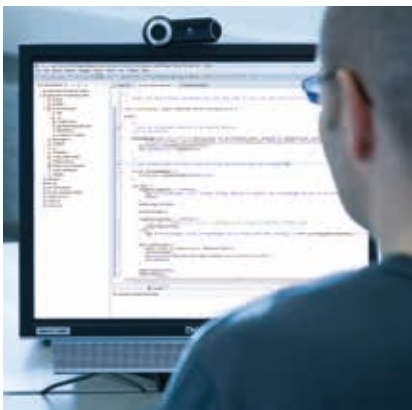

- Steam boilers
- Heat pumps
- Solar energy plants
- Hot water storage tanks
- Central air-conditioning devices
- Fan coil units
- VAV boxes
- Air humidifiers and dehumidifiers
- Intelligent unitary control
- Underfloor heating
- District heating systems

Individualised, customised and developed together.

Our partnership models for OEM success.

As a technological leader in many areas, SAUTER possesses unique know-how in software development, mechatronics and production. Our OEM partners benefit from this in two ways: They supplement their own range with new and innovative products and impress their customers with guaranteed quality at competitive prices.

Software development

Mechatronics

Production

SAUTER products for OEM solutions:

- Electronic controllers for heat pumps, fan coil units and district heating
- Humidistats
- Monitors and limiters for pressure
- Transducers for temperature, pressure, humidity, CO₂, mixed gas and enthalpy
- Intelligent control units
- Retrofit actuators to fit every valve
- Automation stations

Plastics processing
Fitting
Equipment

Freedom in functionality and design: make our products your own.

Thanks to our expertise in the development of electronic and mechanical components, the functionality and design of OEM products can be adjusted individually. With specialist knowledge in plastics processing, equipment and fitting, we enable customised solutions, from customer-specific labels to individual product housings and specific cable lengths. OEM partners benefit from guaranteed delivery dates and competitive pricing.

Tailor-made new developments? SAUTER is your best bet.

We know what it means to develop a future-oriented overall solution. Supported by our leading technology platforms, we provide the entire spectrum of services from consulting to the development and production of customer-specific electronic and mechatronic solutions. Ready-made electronic and mechanical technology modules enable us to react quickly to local market requirements and cost-efficient solutions.

One plus one equals three: together we are stronger.

SAUTER is your ideal partner for the development of products and solutions. Working closely with you, our specialists bring their expertise to the joint development process and enrich the customer solution with SAUTER products. Heat pumps can be made more energy efficient, ventilation systems more intelligent, room and building automation more convenient and energy costs reduced significantly.

Proven worldwide, tested locally.

OEM brand quality from Switzerland.

Products from SAUTER meet the highest quality standards. The know-how of our specialists, teams and technology partners all over the world is continually developing our solutions. Comprehensive factory and operational checks guarantee reliability and an above-average serviceable life. Certified according to relevant international standards, our components usually exceed the required level. We are also experts in performing country-specific certifications for OEM partners.

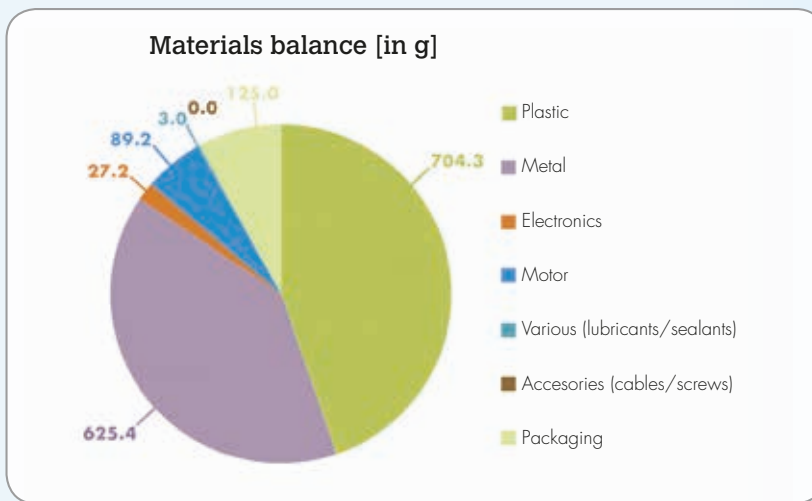

SAUTER subsidiaries and sales organisations all over the world.

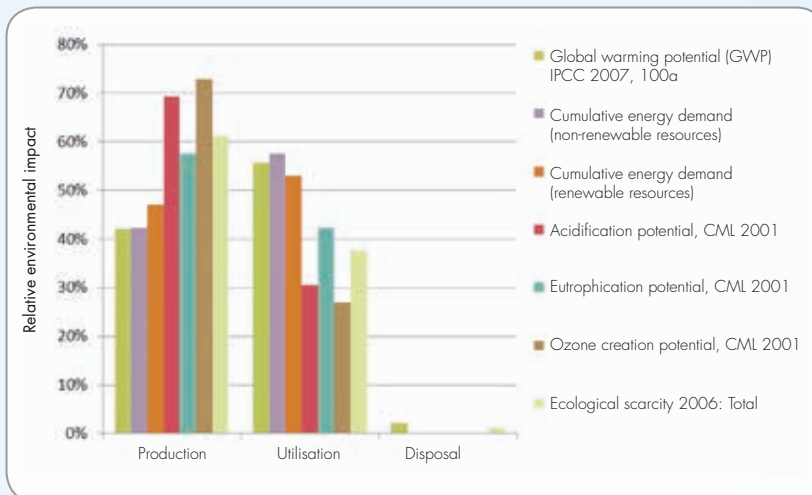

Energy efficiency made easy with SAUTER products.

Proven environmental awareness.

SAUTER attaches great importance to the future-readiness and sustainability of its components and solutions. Our products only use materials that can be returned easily to the recycling chain without limitations. The long serviceable life of the products and energy-efficient production procedures ensure that the responsible use of resources is already a top priority during the development of the product. Additionally, OEM partners can draw on a transparent CO₂ balance for many of our products.

The materials balance and the calculation of the environmental impact provided here relate to type AVM321F110.

SAUTER impresses with expertise and responsibility.

Over 100 years of expertise

Active worldwide - close to the customer

Quality, made in Switzerland

Tailor-made solutions and
comprehensive support for planners and
end customers

Specialising in buildings:
with a comprehensive, modular product
range

Know-how in the manufacturing of complex
products

Still family-owned:
for long-term company development and
stability
